In our area, we have had a rich history of commitment in working together (ISD and Local Districts – Cadillac, Manton, Mesick, Marion, McBain, Pine River, Lake City) to plan, share and enhance curriculum through a collaborative Curriculum Task Force that meets monthly.

The Curriculum Task Force has reviewed the achievement research and set as one of the goals: increasing student achievement through the utilization of quarterly grade level common assessments. To understand and research assessments, an Assessment Learning Community was set up to research and develop a plan of action. It was decided that our first step in developing common assessments would be the development of Pacing Guides. The premise for the Pacing Guides was the ability to have a guide for the taught, written and assessed curriculum. We also recognized an advantage of consistency for transient students. This is a Pacing **GUIDE** – it is not meant to dictate, only provide a starting point. It is also important to note the basis on which the Pacing Guides were developed: v 12.05 K-8 ELA and Math Grade Level Content Expectations. Ongoing alignment and adjustments are planned on an annual basis to accommodate any changes.

Please feel free to do what meets your needs with this information. We only ask that as you develop assessments and resources that would support the Pacing Guides, please share them with us. If you have questions, please do not hesitate to contact me at 231-876-2263.

Thank you,
Karen Mlcek
Director of General Education
Wexford-Missaukee Intermediate School District
